43-44	33.3% (2/6)	16.7% (1/6)	14.3% (1/7)	2.4% (1/41)	0.0% (0/2)	0.0% (0/2)	22.2% (2/9)
All ages	36.2% (42/116)	34.7 (118/340)	33.8% (188/556)	26.7% (131/491)	30.3% (232/766)	27.9% (147/526)	26.2% (118/451)

IVF & ICSI Clinical Pregnancy Rates per fresh cycle started (patient eggs) for year ending June 2014 for all HFEA-licensed IVF clinics in Scotland.

Please note HFEA-published data for Nuffield Glasgow Fertility Services for this date range included cycles for NHS patients. Clinical pregnancy rates for Nuffield Glasgow Fertility Services have been presented both including and excluding NHS patients. Glasgow Royal Infirmary was not operational independently during this period.

Female age	Nuffield Glasgow (excl. NHS patients)	Edinburgh ACS	Aberdeen	GCRM	Nuffield Glasgow (incl. NHS patients)	Ninewells Dundee
<37	43.3% (26/60)	39.2% (140/357)	33.9% (128/378)	35.2% (112/318)	31.8% (241/759)	30.6% (151/494)
38-42	16.3% (8/49)	22.2% (32/144)	26.2% (36/137)	16.7% (43/257)	19.9% (51/256)	12.9% (15/116)
43-44	14.2% (2/14)	0.0% (0/4)	0.0% (0/6)	4.7% (2/43)	13.3% (2/15)	0.0% (0/0)

You can find our [clinic data published on the HFEA website here](#). The current data presented by the HFEA shows the live births for the period ending June 2014 and the pregnancies for the year ending June 2015.

From mid-November 2012 until mid-September 2014, we treated patients transferred from the NHS and these patients are included in the live birth and pregnancy statistics reported by the HFEA for our clinic.

As this information was collected some time ago we have put together our up to date success rates above, which only includes Nuffield private patients.

IVF & ICSI Clinical Pregnancy Rates per fresh cycle started (patient eggs) for year ending June 2015 for all HFEA-licensed IVF clinics in Scotland
