

Nuffield Health York Hospital.

Newsflash

GP & Practice Colleagues Issue 25 - 2015

Welcome.

There are two exciting new opportunities at Nuffield Health York Hospital.

By the end of the year we will have a new static MRI scanning suite and this will add to capacity that is under intense pressure across York.

Secondly we are starting a spinal surgery service with the Neurosurgeon Kenan Deniz.

This will be the only surgical service in York and although initially open to private patients, we hope to achieve NHS access from the CCG in the future.

We will be sending more detailed information to you soon but these services offer the residents of York some real benefits.

Matthew Lamb
Hospital Director,
Nuffield Health York Hospital

To refer patients.

Send your named/unnamed referral direct to us and we will contact your patient.

Latest News.

New static MRI arriving soon.

In early 2016 we will have completed the installation of a new state-of-the-art MRI scanner and moving from a mobile service provided by a third party 3 days a week to an all week bespoke service to benefit all patients with swift access to imaging & advanced technologies. The Siemens Aera, as the top-of-the-line 1.5T scanner, offers various technological features, aiding us in obtaining excellent image quality and maximizing patient experience. We will be able to offer a complete range of imaging including breast and prostate scanning.

The new system is capable of undertaking more complex examinations in much shorter times, meaning a better experience for patients when they attend in terms of the length of time their scan will take. The scanner also has a wider bore which means that there is more space between the patient and the scanner, making it more comfortable for the patient, particularly those who may feel slightly claustrophobic during their examination. Furthermore, the system's 48 channels and lightweight coils give radiographers the flexibility to personalize examinations for patients based on their condition and clinical indication.

The scanning suite will be located within the grounds of the existing Nuffield Health York Hospital where a modern design will enhance the patients experience reducing patient anxiety and stress levels.

We will be offering rapid access appointments, even same day scanning and in some cases patients will have their scans reported immediately after their examination with a prompt efficient access to reports by the referrer. This ultra-advanced scanner will complement our existing suite of diagnostic imaging modalities, which includes Mammography, X-ray, Ultrasound scanning and, exclusively in the York area, Bone Densitometry (DXA).

We would be happy to accept referrals for all areas of MRI scanning for patients having Health Insurance (depending of level of cover) or patients that choose to pay for themselves. Each referral is individually vetted by our team of York based Radiologists so each scan is tailor made to the individual needs of each patient and referrer.

The Nuffield Health Promise is our unique pledge to patients who are paying for themselves.

New Spinal Service launches at Nuffield Health York Hospital.

We are delighted to announce that Mr Kenan Deniz joined the Consultant team at Nuffield Health York Hospital in October. We are pleased to receive referrals for private patients with spinal conditions to see Mr Deniz at his new weekly clinic on Saturday mornings.

Mr Deniz's neurosurgical training took place on the North Thames Higher Surgical Training Rotation where he completed posts at Charing Cross Hospital, Bart's and The Royal London Hospital, Great Ormond Street Hospital and The National Hospital for Neurology and Neurosurgery.

He then relocated to Neurosurgical Unit at The John Radcliffe Hospital in Oxford to gain Fellowship experience in lateral skull base surgery, in particular surgery for vestibular schwannoma and endoscopic pituitary surgery.

He returned to London in January 2012 when he commenced a Neurovascular Fellowship at King's College Hospital gaining invaluable and unique training in the decision-making and operative management of brain and spinal vascular malformations, including the clipping of aneurysms and excision of AVMs.

He was appointed Consultant Neurosurgeon at Leeds Teaching Hospitals in 2012 with specific subspecialty interests in Neurovascular and skull base surgery.

He is fully trained and competent to perform the full range of cranial and spinal surgeries, including neuro-oncology, spinal and neck injuries and neurosurgery.

For further information or to refer a patient to Mr Deniz please telephone **01904 715111**
